

FOR TEAM BUILDERS & PARTNERS

Three Ways to Earn Building With FutureBit Staking

A complete, detailed guide to every passive-income layer available to referrers and team builders on FutureBit Staking (FBiT) — how each one works, exactly what you earn, and how they stack together when you grow a real team.

One-Time Referral

10 levels · up to 17.75%

Recurring Referral

5 levels · up to 10% every claim

Team Target Bonus

10 tiers · up to +10% APY

futurebit.in

10-Level Stake Referral

This is the original referral layer, and it hasn't changed. The moment someone you referred (directly or through your downline, up to 10 levels deep) **stakes for the very first time**, a commission is paid instantly — straight from the reward pool, not from their stake. It only fires once per person, on their first stake ever.

LEVEL	RELATIONSHIP	COMMISSION
1	Someone you referred directly	0.25%
2	Their referral	0.50%
3	Their referral's referral	1.25%
4	4 levels down	1.50%
5	5 levels down	1.75%
6	6 levels down	2.00%
7	7 levels down	2.25%
8	8 levels down	2.50%
9	9 levels down	2.75%
10	10 levels down (deepest)	3.00%
Total across all 10 levels		17.75%

WORKED EXAMPLE

Your Level-1 referral stakes	1,000 FBit
Your commission (Level 1 = 0.25%)	2.5 FBit
Paid to your wallet	Instantly, on-chain
If that person later refers someone who stakes 1,000 FBit, and you're their Level 2 upline	+5 FBit (0.50%)

Key rule: a referrer must already have an active stake themselves before someone can register under them. This means every link in the chain is a real, staking participant — not an empty placeholder.

5-Level Claim Referral

This is the newer, separate layer — and the biggest difference from Layer 1 is that it pays **every single time** your referral claims or compounds their rewards, not just once. Someone who claims daily pays their upline daily. It only reaches 5 levels deep (not 10), and it's funded differently: it's carved out of **that claim's own reward** — never drawn extra from the shared pool, so it never shortens anyone else's rewards.

LEVEL	RELATIONSHIP	COMMISSION
1	Someone you referred directly	3.00%
2	Their referral	2.50%
3	Their referral's referral	2.00%
4	4 levels down	1.50%
5	5 levels down (deepest for this layer)	1.00%
Total across all 5 levels		10.00%

WORKED EXAMPLE — YOUR LEVEL-1 REFERRAL CLAIMS 100 FBiT

Gross reward they're claiming	100 FBiT
Platform fee (0.25%) deducted first	-0.25 FBiT
After-fee amount the referral layer is % of	99.75 FBiT
Your commission as their Level 1 upline (3%)	2.99 FBiT
Paid to your wallet, same transaction	Instantly, on-chain

If a level can't be paid (that upline is inactive, blocked, or missing) — the system never just keeps that share. Half of it burns (further reducing supply) and half goes back to the person claiming. Nothing is lost into the platform's own pocket.

Team Target Bonus

This one isn't paid per-person — it's a bonus **extra APY** on top of your own staking rewards, based on how much your entire downline network has staked combined (everyone you've referred, and everyone they've referred, all the way down). The bigger the team, the higher your own personal APY climbs — applied automatically on every claim or compound you make.

Bronze +2% 50K FBit	Silver +3% 100K	Gold +4% 250K	Platinum +5% 500K	Diamond +6% 1M
Ruby +7% 2.5M	Emerald +7.5% 5M	Sapphire +8.5% 10M	Obsidian +9% 20M	Titan +10% 100M

WORKED EXAMPLE

Your own stake	5,000 FBit
Your downline network's total staked (all levels combined)	120,000 FBit
Tier reached	Gold
Extra APY added on top of your base dynamic APY	+4%

Why this matters for team builders: unlike the two referral layers above, this one keeps growing in value the more your **WHOLE** team stakes — even stakes made by people 8 or 9 levels below you count toward your own tier. A large, active team can push your personal APY well above the base rate.

How All Three Layers Work at Once

These three layers are completely independent — they're calculated separately and paid separately. A serious team builder earns from all three simultaneously, on the same downline.

One-Time Referral (Layer 1)

Paid once, the instant each new person's first stake lands

Recurring Referral (Layer 2)

Paid every time a direct/near referral (levels 1–5) claims or compounds

Team Target Bonus (Layer 3)

A standing +% APY boost on your own rewards, from your whole team's size

1

You share your referral link

Every person who joins through it is permanently linked to you on-chain — this can never be changed later.

2

They stake for the first time

You (and everyone above you, up to 10 levels) get paid the one-time Layer 1 commission immediately.

3

They claim or compound rewards over time

Every time they do (if they're within 5 levels of you), you get paid the Layer 2 recurring commission again — for as long as they keep staking and claiming.

4

Your team keeps growing

As your downline's combined stake crosses each Team Target tier, your own personal APY (Layer 3) permanently increases — no extra action needed.

None of this costs the person you referred anything extra. Layer 1 comes from the shared reward pool. Layer 2 comes out of the referral's own claim (they'd pay burn either way — this replaces part of what would've been burned with a payment to you instead). Layer 3 is simply a bonus rate on your own stake.

COMMON QUESTIONS

Before You Start Building a Team

Q. Do the two referral layers add up to one combined percentage?

No — they're separate systems with separate math, calculated on different bases (Layer 1 on the stake amount, Layer 2 on the after-fee claim amount) at different moments. Don't add 17.75% + 10% and expect that number to mean anything; track them independently.

Q. Do I need to do anything to receive these payments?

No manual claiming required for referral income — it's paid automatically, on-chain, the moment the qualifying stake/claim transaction happens. It lands directly in your wallet.

Q. What if my referral hasn't staked yet — do I still count them for Team Target Bonus?

No. Only actually-staked amounts count toward your team's total. Someone who registered under you but never staked contributes 0 toward any of the three layers until they actually stake.

Q. Can I see my team's breakdown — who's in it and what they've staked?

Yes — the Referral tab in the app shows your full network (all 10 levels), each member's stake, and now also how many people each of them has personally referred, so you can see exactly where your team's growth is coming from.

Q. Is any of this guaranteed or fixed forever?

The percentages described here reflect the current live on-chain configuration. Like any DeFi protocol, on-chain parameters could in principle be adjusted by governance in the future — but the mechanism itself (two referral layers + team bonus) is core to how the protocol is built.
